

I go to West Virginia quite often. I cannot get anything worth listening to in most areas that I go to over there. I really enjoy having the XM available. This is a good service to have available. The traffic information does not do me any good where I live, but I would use it if I traveled to those citys. People have a choice to pay to listen to XM or use regular radio channels. If anything, allow XM to expand their offerings to those willing to pay. Thank you.
